

# Or put 8 terabytes to the rack

For another option in data storage, users can look at the new Mercury Rack Pro "Quad Interface" from Other World Computing. According to OWC, the unit is specifically designed to meet the demands of audio and video production and data and network operation centers.

The model is available in six preconfigured solutions, from 2–6 TB, priced from \$899.99. The Mercury Rack Pro "Quad Interface" supports up to four 2-TB 3.5" SATA I/II-type hard disk drives for up to 8 TB of total storage capacity. Other features include rear panel selectable hardware RAID settings, quiet operation, system status and drive activity LED indicators, and others.
